SENSATIONAL! NEW! TETRA PETKUS RYE For Grain **Pasture**

Modern Chemical Magic combined with the remarkable skills and techniques of modern plant breeding have resulted in an entirely new type of Rye offering unusual possibilities for production and profit. Known as Tetra Petkus Rye, this new variety of fall rye has been created by applying chemicals to diploid Rye. This doubles the number of chromosomes and results in a vast improvement over previous diploid strains.

PLANT CHARACTERISTICS AND FEATURES -

EXTRA YIELD—actual yields have varied from 35 to 60 bu. per acre.

GIANT KERNELS—over twice the size of ordinary rye grains.

STRONG, SHORT STRAW—stands well in rich soil—supports vetch better than ordinary rye.

HEAVY STOOLING—helps control weeds and erosion. Contributes to extra yield.

VIGOROUS GROWTH—sprouts and emerges quickly.

HIGHEST POSSIBLE YIELDS.

EXTRA DROUGHT RESISTANCE—vigorous growth and heavy root system takes advantage of early moisture. LATER MATURITY—heads out about 2 weeks later than Balbo but grows and matures rapidly after heading.

YOUR CUSTOMERS WILL WANT TO TRY IT! SUPPLY IS LIMITED! ORDER NOW! NOTE: TETRA PETKUS SHOULD BE GROWN IN REASONABLE ISOLATION FROM ORDINARY RYE IN ORDER TO ASSURE

(SEE INSIDE FOR PRICES)
